

Protective Windows for High Power CO₂-Lasers

Protective windows are mostly used for optics protection in high power laser applications like welding and cutting. We manufacture protective windows for CO₂-lasers (9.2µm ... 10.6µm). Below in the table we present our standard protective windows. They are made from ZnSe laser grade and have antireflection coating.

Material: ZnSe laser grade, AR/AR@10.6µm (standard)

size	price EUR / pc 1-20 pcs	size	price EUR / pc 1-20 pcs
dia 6.35 x 2 mm	16.90	dia 9.53 x 2 mm	24.90
dia 12.7 x 2 mm	28.90	dia 19.05 x 2 mm	34.90
dia 25.4 x 2 mm	47.18	dia 25.4 x 3 mm	59.67
dia 38.1 x 3 mm	132.18	dia 50.8 x 5 mm	290.85
